## Connect Your Facilities and Eliminate Your Headaches

Equipment wears out, fails and breaks. But you don't need to be the last to find out. At Titan Cloud we connect and monitor your equipment so that you can take swift action before a small problem becomes a major event.

## Ready to supercharge your facility maintenance?

See how our next-gen platform can help. Contact [roi@titancloud.com](mailto:roi@titancloud.com) to learn more.

### ATG MANAGEMENT

#### Supercharge Your ATG

Manage your ATGs remotely: web, terminal, console access, batch commands, bulk config changes – all without having to go onsite.

### ADVANCED FACILITY INSPECTIONS

#### Digitize Your Outdated Inspections

Turn any inspection into a digital checklist that can be run on a phone, tablet or laptop and link directly to your maintenance dispatch process.

### WORK ORDER MANAGEMENT

#### Data-Driven Work Orders Deliver Faster Resolution

Connect your CMMS or use our built-in work order system to easily dispatch when needed with the appropriate data for first time resolution. And automatically link corrective action documentation to the initial alarm for simplified audit readiness.
