

Real-Time Visibility from Terminal to Pump

Don't let disruptions, pricing volatility, or manual processes hold you back. Titan Cloud's modern software enables real-time, end-to-end fuel operations.

Trusted by

Control Your Supply Chain. Optimize Your Operations.

Eliminate supply management guesswork, reduce runouts, and automate orders and deliveries based on historical data and utilization. Automated back-office processes also help to streamline dispatch to invoicing, ensuring effortless reconciliation. No more mistakes or wasted effort; just transparent, efficient fuel management.

SUPPLY MANAGEMENT

Optimize Your Pricing

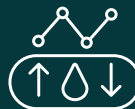

Automate complex buy- and sell-side contracts across providers and terminals with daily price changes. Snag best buys (spot buys) with smart pricing and freight consideration with real-time allocation management.

PRECISE FORECASTING

Automate Your Inventory

Our algorithms predict your fuel site's needs at the tank level to ensure your fuel deliveries are perfectly timed and sized.

UNIVERSAL DISPATCHING

Slash Fuel & Transport Costs

Loads and order can automatically or interactively be dispatched across drivers and haulers to hit an optimal ETA window.

CARRIER MANAGEMENT

Hold Carriers Accountable

Audit carrier performance with exception reports and receive alerts for on-time delivery performance and order delivery accuracy.

BACK-OFFICE OPTIMIZATION

Ensure You Execute to Plan

Real-time BOL reconciliation and invoice matching allow you to easily identify and track delivery quantity variance, duplicate invoices, unknown deliveries, and missing deliveries.
